ORDER IS PUZZLE
TO FRENCH POLICE

ther and Son Slain in
Mysterious Way.

Paris.—Edgar Allan Poe could not easily conceive anything more mysterious than a crime which is now occupying the attention of the French police and which has sent a thrill of horror through the nation.

Two days after a trunk in wicker was deposited in the baggage department of the station at Lille, in the north of France, some attendants complained of an unpleasant odor arising from the basket.

Find Man's Body.
Each day it became worse. The trunk was finally opened. Pressed tightly in the wicker box was the body of a man. The legs had been bent at the chest and tied there, arms and hands were missing; the face was recognizable.

Police were not long in identifying the victim as Francois Rigaudin, age thirty-three, living in Paris. They also, too, that the trunk had been sent from Paris to a nonexistent address at Lille.

Working threads of the story together with the thorough method of the French Surete Generale and experts are renowned, the detectives made the startling discovery that the victim was the son of an elderly woman, who had herself been murdered some months before with the murderers being discovered.

The mother, Mme. Marie Blanc, had been killed by bullet shots at midday in her son's home.

It had been expressed that Mme. Blanc had been the victim of a band of international revolutionaries, since it was known that at one time she had been considered to Almercy, one of the noted Bonnet Rouge gang of anarchists. Almercy himself had admitted suicide in prison after the arrest of members of the gang, being shot around his neck.

After the arrest of the Bonnet Rouge gang, mother and son were slated to have lost sympathy with the revolutionary movement.

Theory of Revenge.
The theory that both Rigaudin and mother were struck down by the former companions was suggested when it became known that on a day or two before the murder, the son, four men called upon him at his house where he was staying temporarily in Lille. They were all strangers. A woman in black also followed their visit.

Rigaudin received a telegram making an appointment outside Paris. He left Lille and was heard of him until the day of his body in the station baggage room. That he went to Paris was evident, since the trunk containing his remains was sent from Paris du Nord at Paris by a person unknown.

Rigaudin worked as an accountant for several small firms and was not a man. Neither had his mother wealth. What, then, could be the motive of the double murder if not revenge? Every possible clue has been sifted by the eagle-eyed French police, but the assassins have vanished.

Health of Girl
Leads Her to Kill Self
Paris.—Many peculiar reasons are given for committing suicide, but it is not always clear why a young Berlin woman who lost her life because she was in good health.

girl, Erna Czogor, called upon a physician in Charlottenburg for an examination. She seemed perfectly healthy when she entered the office. The doctor believed that she was one of those modern persons who undergo physical examinations to anticipate and thus prevent illness. He did as he was requested and when he was finished told her she was perfectly sound and in excellent condition.

Head of appearing pleased, however, Erna became nervously excited, uttering a word she fled from the examination room. A moment later a revolver shot was heard in the hallway. Unfortunately, a physician could reach her she had died.

Erna Hewes' Widow
Dies as Husband Lived
New York.—As "Hewes," the magisterial life—a mystery—his death, Mrs. Hewes, who lived in a four-room apartment here, died, and strangled to death. There was nothing to explain the circumstances under which she died. Mrs. Hewes was found by a maid. Mrs. Hewes, who had made a practice of fortune telling for the entertainment of friends and callers, apparently was a devotee of the occult. She had deposited large sums.

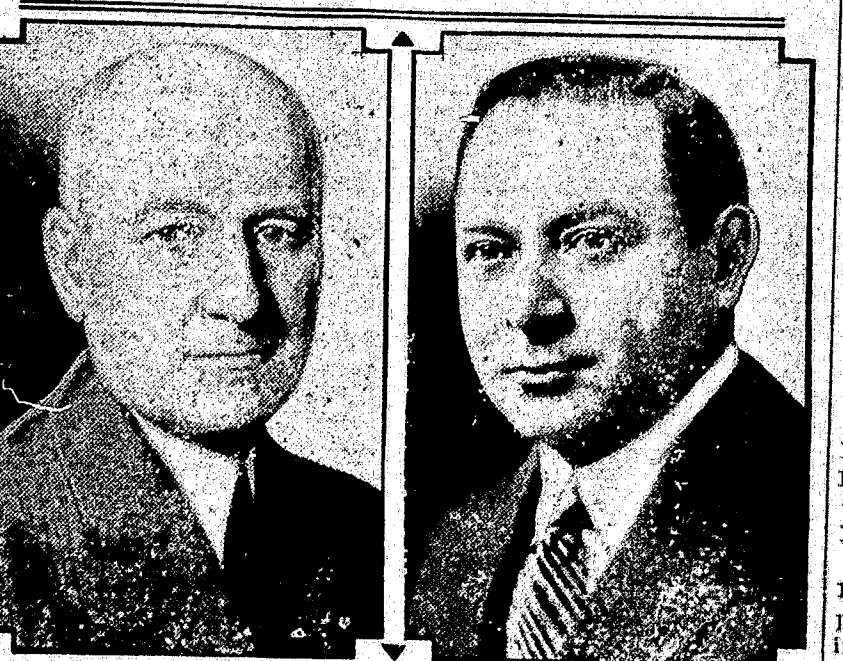

Injected Into
Veins Aids Tuberculars
London.—Gold is being used as a treatment for consumption at Brompton hospital here. A salt of gold is injected into the veins of the patients, and the results are said to be very satisfactory. It is a Danish discovery.

DECADE BRINGS VAST RADIO CHANGE

Tenth Anniversary of Organization Formed to Foster the Art in America Emphasizes Progress.

The story of a decade in which communication leaped beyond the wildest dreams of years that had gone before is anniversary, marking the passing of ten years since the Radio Corporation of America was founded, is significant for the extent closely with the great changes which have pushed back world horizons.

How great these changes have been it is hard to realize now that radio is accepted casually as one of the biggest of American industries, doing a business of more than \$600,000,000 a year. It helps to bring some realization to consider radio as it appeared to the men who formed the corporation, starting business on December 1, 1919. Broadcasting as it is today, with

GENERAL JAMES G. HARBORD

MR. DAVID SARNOFF

40,000,000 listeners in the United States, was undreamed of then. Trans-oceanic radio, telegraph and ship to shore communication were the interests of the men who were brought together by Owen D. Young, now Chairman of the Board, with the sympathetic cooperation of the government.

President Wilson feared the Alexander Graham Bell would enable the British to dominate radio telegraph, as they already dominated ocean cables and, at his request, the General Electric Company canceled negotiations for the device with the Marconi Company. It was to create a radio communication organization capable of holding its own against foreign competition and to supply such American organizations as the General Electric with a home market for inventions on which huge sums had been spent that the Radio Corporation was formed, welding under one central organization America's principal radio inventions and research facilities.

Now the history of the corporation

company's first roll was had been working in telegraphy lines boyhood; Dr. Alfred N. Goldsmith, Director of Research, a scholar of radio.

The possibilities of broadcasting suddenly were realized in 1920 and one of the most striking developments of modern times is summed up in the fact that between then and the end of 1922 the number of receiving sets in the United States increased from 30,000 to 1,500,000.

In the years that followed the Corporation organized a decade ago to further America's interests in radio telegraph has played its leading part in a changing world. Always developing that first interest in radio telegraph, it has acquired an important position in the closely allied amusement field. It has a substantial interest in the production, distribution and exhibition of sound-motion pictures, with increased facilities for furnishing entertainment and education on records, on films, through the air, in the theater and in the home.

Fore Street, Oxford

The school had a nice tree and the usual Christmas program. There was also a Sunday School Christmas tree at Leon Twitchell's. A car load of young folks were up from the village and all reported a good time.

Mr. and Mrs. Will Twitchell had all their children and grandchildren with them during Christmas Day.

Arthur Henry of Rumford was a Friday night guest at A. D. Cummings'. Miss Alfreda Haskell spent Monday afternoon and evening at A. O. Twitchell's before leaving for her work in Massachusetts.

Bessie Trebilcock from Oxford visited at her daughter's, Mrs. Leon Twitchell's, from Tuesday until Saturday.

Mrs. Flora Cummings is up around the hospital again and her many friends hope she will be at home soon. Albert Twitchell has been hauling ice for several parties.

Lawrence Brown of Norway Center was a week end guest at E. B. Twitchell's.

Mrs. L. Bryant of Hartford is assisting Mrs. A. Twitchell with her work. Mrs. A. D. Cummings is sick. Her daughter, Margaret, is home caring for her.

Oscar Twitchell is hauling wood from the Smith farm to Norway for Mark Smith.

ROWE HILL, GREENWOOD

The Bryant School closed Friday, Dec. 29, for one week, to be reopened Dec. 30. The children had a Christmas tree and presented a short program Friday evening.

Miss Towle went to West Paris Dec. 19 to attend Miss Smith's Christmas program at Richardson Hollow, but owing to the stormy evening did not go but returned to Bryant Pond the same evening. Miss Smith from Richardson Hollow was the guest of Miss Towle Friday and Friday night, Dec. 26.

Christmas guests in the neighborhood were Mrs. Elsie Cole and children, Elvira and Everett of Greenwood Centre, Mr. and Mrs. Theodore Dunham, Locke Mills, Mr. Elton Dunham, and Mr. and Mrs. Burward Lang and son Merle, Bryant Pond, at Newton Bryant's. Mrs. Abbie Hayes was the guest of

her son, Leren Roberts, and family, Howe Hill. Her grandson, Wendell Roberts, returned with her for a few days visit at Wesley Ring's.

Wesley and Linwood Ring were guests of Mr. and Mrs. Arthur Andrews, Bryant Pond.

Mrs. Elton Dunham visited her mother and brother's family, at Greenwood City recently.

Edgar Dunham is sawing ice for several parties at Greenwood City.

Winifred Bryant has not been as well the past week and is unable to return to high school this week.

William Emery of West Paris was at his camp near Indian Pond Sunday.

Newton Bryant is confined to the house with the prevailing cold and cough.

Wilmer Bryant is hauling hay to different parties at Bryant Pond from the Day farm.

Carl Brooks and Edgar Dunham attended the Christmas Cantata at Bryant Pond.

We are very sorry to learn of the illness of Mrs. Wesley Cole of Locke Mills.

Clyde Dunham and son Leland of Locke Mills were at Elwin Dunham's Sunday.

Mrs. Mabel Dunham and Mrs. Margaret Bryant were at Bryant Pond last Friday, calling.

NORTH PARIS

The schools opened Monday after a week's vacation. The teachers, Misses Colby and Dorothy Dean, are riding with Mrs. D. H. Perkins, Richard Earl Lowe and Zella Iola. Mr. and Mrs. Perkins were in the car at 10:30 o'clock Christmas morning at the home of her mother in Sumner. Rev. L. N. Tillson of East Sumner officiated. They will reside with mother, Mrs. Amy Farrar, for the week. Mr. Lowe is the son of Mr. and Mrs. B. C. Lowe of this place and lived his education in the Paris schools. Mrs. Lowe is the daughter of Mrs. Amy Farrar of Sumner and lived her education in the Sumner schools. Both are popular among the younger set. They will have a reception in New Year's night to which everybody is invited.

Mrs. Florence Pierce entertained one of the young people Monday evening in honor of her birthday which occurred Saturday. After rehearsing drama, games were enjoyed. Refreshments were served. Mrs. Pierce received several nice presents. Miss Lyla Perkins of Brooklyn, N. Y. is visiting her brother, D. H. Perkins, and family.

Mrs. Nina Felt of Norway spent the day with her daughter, Mrs. Florence Pierce.

Charles Coffin of East Sumner spent Christmas day also the week end with parents, but in order to get here to go to Buckfield through to Burn, Mechanic Falls, South Paris West Paris and home.

Mont Brown of Bryant Pond spent Christmas day with Mr. and Mrs. W. Brown.

Esther Valentine is home for a two week vacation from her work at South Paris.

Mrs. Elmer Dunham left West Paris Friday, Dec. 20, to join her husband, Battle Creek, Mich., where he has employment.

Miss Florence Hart of South Paris, who is attending Gorham Normal school, is spending two weeks vacation with her parents, Mr. and Mrs. Hart. Mr. Hart, Floyd, Winfred, and Howard Hart came from Wilson Hills to spend the holidays with Mrs. Hart.

Leo Wheeler of Auburn and Eddie Simmons of West Poland were callers at S. E. Coffin's Sunday.

SOUTH WATERFORD

Mrs. Charles Packard is sick. Her daughter, Mrs. Howard Dearborn, from Auburn is caring for her. Farm Bureau met at South Waterford Friday, Dec. 28, with a fair attendance. The forenoon was devoted to moving pictures and lantern slides. In afternoon to election of officers. Delicious dinner was served at noon. Little Irene, daughter of Mr. and Mrs. Clyde Millett, burned her arm badly about two weeks ago. She is improving slowly.

Mrs. Marjorie Kingman has been in hospital several days caring for her mother, Mrs. Abbie Adams, who has been sick.

Newton Brown, who is attending Gray High School, has been visiting grandparents, Mr. and Mrs. Bion Brown.

Richard Brown has returned home from the C. M. G. hospital.

Bar Mountain Grange met for its meeting for the year Saturday, Dec. 29, at 1:30 P. M. It was voted to accept an invitation from North Waterford Grange to meet with them Friday, Jan. 11 for a joint installation. Round Mountain Grange from which will also be present. It is noted that many can go from this range.

Mrs. Merton Kimball visited her parents, Mr. and Mrs. Merritt Sawin, one last week.

WEST GREENWOOD
William Harrington of Portland is spending Christmas with his aunts in this city.

Mr. and Mrs. Paul Croteau spent Christmas with his sister and family in Lewiston.

Ernest Cole on Howe Hill is working for the E. L. Tebbetts Co., Locke Mills. Willie Harrington of Massachusetts is spending her Christmas vacation at home.

Gertrude Harrington spent a few days recently with her sister, Mrs. E. L. Tebbetts, of Sabattus.

Henry Croteau was a recent caller in town.

Paul Croteau intends to move to Lewiston for the winter.

Will Seams was home for Christmas. Nellie Harrington spent one day last week with her sister in Lewiston.

Ruth Cole visited at Locke Mills Sunday.

Mrs. Cross has had a new radio in her home at Locke Mills.

BERNARD'S MILL, ALBANY
Albert McAllister is hauling pulp for the plant.

Mr. and Mrs. Will McAllister, Maud Galloway and George Briggs were in town Monday.

Mr. and Mrs. Albert McAllister and

hubby visited her parents at Lovell Sunday.

Mrs. Bernard Allen, who has been very sick, is gaining slowly at this writing.

Mrs. Flora McAllister is caring for Mrs. Bernard Allen.

Harlan Bumpus and Clayton helped Carl Penley move his camp Friday.

Irvin Becker was in this vicinity Sunday.

Little Clyde Allen is stopping with his grandparents, Mr. and Mrs. Howard Allen, for a while.

Mr. and Mrs. Hall visited her father, Fred Littlefield, recently.

Those who attended the Christmas tree at Hunt's Corner from this vicinity Friday night were Mr. and Mrs. Harlan Bumpus, Arthur Haselton, Wallace Cummings, Mrs. Tom Logan and family and Will McAllister, Jr.

Harlan Bumpus and Albert Keniston are cutting timber for Fred Littlefield.

Radio Reaches Out To Many Other Arts

In addition to transatlantic service, radio, now being developed as a point-to-point communication system, promises this year to add considerably to the transatlantic telegraphic facilities of the United States, according to David Sarnoff, Executive Vice President of the Radio Corporation of America.

"Radio as a service to the home has been reaching out for association with other established arts of entertainment and education," Mr. Sarnoff says. "In the refinement of musical and speech reproduction, in combination with the modern phonograph (to render the two distinct services involved in broadcasting reception upon the one hand, and in recorded, selective programs upon the other), in the field of sound-motion picture development, radio faces another season of progress."

"It includes in its scope both sound and sight, both color and perspective."

"It is the first system of communications that has largely removed the limitations of time and space from the distribution of music and speech; it promises eventually to transmit the spectacles of life by sight communication. No channel of transmission offers a greater field of expression to the entertainment art."

INSTITUTE TO FORM SCHOOLS OF RADIO

Announcement just has been made of the formation of the R.C.A. Institute, Inc., a subsidiary of the Radio Corporation of America, for the purpose of establishing radio schools in various cities throughout the country to meet the steadily increasing demand for trained radio men. The new organization is the successor to the Marconi Institute founded in 1909, and the oldest commercial radio school in existence. Rudolph L. Duncan, for many years Director of the Radio Institute of America, is president. General J. G. Harbord, president of the Radio Corporation of America, is Chairman of the Board.

Headquarters and the main school will be at 325 Broadway, New York. The new organization has acquired also the Philadelphia School of Wireless, founded in 1911, and the Eastern Radio Institute of Boston, founded in 1913.

Left Study of Law To Write Songs That Live

One of the songs that mother sang long ago it seems began: "Darling dear, we are old and gray; fifty years since our wedding day." A plaintive melody it was that hurried the sand man on his rounds. United States midshipmen still march to and sing of "Nancy Lee who waves her hand upon the quay." Wherever English speaking sailors gather the song is sung. More modern are "The Holy City," "Slips of My Dreams," and "Rose of Picardy." All are the work of an Englishman.

Frederick Edward Weatherly was his name. He was born October 4, 1848; graduated from Brasenose College, Oxford, in 1871; admitted to the bar. Inner temple, London, 1887. Thereafter he turned poet and wrote the songs of the English speaking world and let who would hear after his law. Only a few of his more famous songs have been named here.

It is not to be wondered at that of his large output many have been forgotten. The wonder is rather that a man trained in the dry and dusty intricacies of law should have created songs so near to being immortal. In the sense at least of being a long time.—St. Paul Dispatch.

The fondest man of our acquaintance confesses his remembrance with a note: "Each one is a check, as you have already discovered."

Our idle wonder for the day is how a baldheaded man known where to stop when he starts wiping the perspiration from his forehead.

"I never convince the wife of anything," says the office cynic, "but I like to argue with her because I always find where I was wrong."

Explaining Bent Cross on Crown of Hungary

With reference to a question recently asked concerning the famous St. Stephen's crown of Hungary and the reason why the cross on top of it is bent, a Hungarian reader, B. S. J. writes as follows: "As a painter, I painted signs which bear the Hungarian royal crown. My master told me they had a revolution in 1848 and some one buried the crown in the forest of Lankov, southeast of Zlatice. No body knew of it for years until Franz Josef was to be crowned. The government sent men to look for it and by the help of a Serbian shepherd they found it with its cross bent." This story is confirmed by General de Wenden's book, "The Real Francis-Joseph," which states: "Before Kossuth left he buried with his own hands the Hungarian crown, the old crown of St. Stephen. In the neighborhood of the frontier village of Orsova. When it was recovered later, the little cross on the top was bent on one side. From this time onward the arms of Hungary have borne a crown with a cross bent toward the left."—Detroit News.

Beaver's Powerful Tail Serves Many Purposes

There is a popular belief that the beaver's tail is shaped as it is to enable him to use it as a shovel in his construction work. Scientists, however, have observed that the beaver usually carries in his fore paws the mud, rock or sticks with which he builds and that he uses the tail to steady himself, either by planting it on the ground or by waving it from side to side. In the water he uses it as a rudder and sometimes as a propeller.

The beaver's tail is flat and wide. Its steering power is taxed to the limit as the beaver swims, tiggles, by the side of a pole or log that he is towing to the house, dam, or food cache. It keeps him from moving in circles. By its loud signs on the surface of the water, the tail also serves as a "signal gun" which acts as a warning to friends or enemies.

Wensel's Store

In a recent issue we mentioned a bird that provides stores for the winter. Wensels share this foresight.

When slicing a poplar at a sawmill it was found that no fewer than 44 mice had been carefully stocked, one above the other, in an ordered pile, with sand and mould between them, to form an airtight mound. These mice were in as fresh condition as if they had just been caught.

Coconut Propagation

Coconuts are propagated differently from almost any form of fruit or nut. The coconut, as it forms in the outer hull, is buried in the ground, and the embryo germs nourishment first from the coconut milk, and as the growth of the plant advances the white meat which we eat becomes soft and spongy, and also feeds the young plant. After a certain stage of development has been reached small roots reach out into the ground, and by the time they are sufficiently long and strong enough to feed the nourishment to the plant from the earth the original coconut has entirely disintegrated.

Milton and Music

Much depends upon when and where you read a book. In the five or six impatient minutes before the dinner is quite ready, who would think of taking up the "Faerie Queene" for a stanza, or a volume of Bishop Andrews' sermons?

Milton almost requires a select service of music to be played before you enter upon him. But he lends his music, to which who listens can need bring idle thoughts, and paradoxes.—Lamb in "Detached Thoughts."

Galileo's Discovery

It is recorded that Galileo was one evening in the cathedral of Pisa. The swinging of a high chandelier caught his attention, and he watched it closely as its distance of travel diminished.

Finally he observed a significant fact—no matter how wide the arc described by the chandelier, the time consumed in one complete oscillation was always the same. From this observation came the construction of clocks, the forerunner of the modern pendulum timepieces.

Alarming Moment

Eight-year-old Barbara had been having afternoon on the shores of the Wausau, gathering live muskrats for her mother. She took them up to her room, and evidently a night light that was left burning when she went to bed stimulated the cat's curiosity to action, for her mother found her calling in great alarm: "Barbara, come here! Those shells under their mouths at me!"—Indianapolis News.

Finding Key of Music

Every key signature stands for a key, a major and its relative minor. This is determined by the chords and if to a minor key the accidental appears to define the leading note. The last note in the bass is almost always the key note.

NEW FORD BODY TYPES ON EXHIBITION HERE

Presentation of new and smarter body types and a group of new colors for the Model A Ford has been announced by Herrick Bros. Co., local Ford dealers, who emphasized the fact that no mechanical change is contemplated in the car because of the thoroughly satisfactory performance it has been giving.

They described the car as follows: "Redesigned along ultra modern lines, the new bodies will have a distinctly refreshing appearance, with all the beauty and charm of contour, line and proportion usually associated only with custom coachwork and large cars."

The entire front of the Model A is redesigned and in beautiful proportion to the new body types. Moulding treatment is new, and fenders are of more generous dimensions, flowing with the lines of the car. A new treatment in the contour and sweep of the bodies, with a graceful forward pitch, gives the impression of fleetness.

Every line from the flat radiator to the tip of the low, graceful nose of the rear fenders is new, clear and extremely smart.

Rustless steel will be used for radiators, shell, headlamps, hub caps, all bright and shining, and will stay shining in this rustless steel chrome-plated, not on the outside, like a thin cover, but is alloyed with the iron. Moisture, whether from water, steam, or snow, will not rust it.

Perhaps the most striking change in the new Ford is the new radiator. Retaining the Ford individuality, the contour of the shell is extremely attractive, blending beautifully with the new fender lines and other changes. The top follows somewhat the lines of the old shell, with narrower lines down each side, which curve into a flare at the starter opening in the center of the lower section.

The general effect is one of greater height and less width, which, combined with the sweeping curves, contributes to the trimness and smartness of the whole car.

This effect is heightened by a sturdy wheel, finished in black enamel, which is in a graceful arch from each fender. It supports the license bracket, and the headlights, which are higher than before.

Additional strength has been built into the body by the construction of the cowl, the sides of which extend in one piece up along the windshield pillar to the roof line. Not only does this give sturdiness, but it reduces the possibility of squeaks. While cowl lights are standard equipment only on the Town Sedan and Cabriolet, all body types have been wired for them, and they may be installed at small cost.

A sturdy, compact design of the wheels has been produced. They are smaller in diameter and consequently made complete, in one piece, all of the steel spokes being electrically welded to the hub shell and rim. The angle at which the spokes are placed helps to distribute the force of road shocks and gives greater strength.

With the use of the smaller wheel the tire size has been increased from 4.50x21 to 4.75x21 inches. This adds to the comfort of the passenger.

NEW FORD BODY TYPES ON EXHIBITION HERE

in a car already remarkable for its easy riding qualities.

A variety of colors has been added and may be obtained by the purchaser without additional cost. Much study has been given to this matter and an especial effort made to please the women motorists.

The most notable changes in the body types have been made in the Tudor Sedan, the Coupes and the open cars.

The Tudor Sedan, most popular of the five passenger closed cars, is longer. More room has been given for occupants of the rear compartment. Access is easier around the folding seats in front. In its exterior appearance, the car is much improved. It still retains the crown roof effect with rounded corners on the rear quarter, the beauty of which is accentuated by new body belt and moulding treatment.

The Coupe is entirely new, with

lower roof line. French roof quarters emphasize the low effect and the long lines of the new moulding treatment. Panel effects carried out by the moulding on the rear deck adds much to the smart appearance of the car. No headroom has been sacrificed inside by lowering the roof line, and driving is made more comfortable by an adjustable seat.

The Sport Coupe, which has a rumble seat as standard equipment, has all the lower body lines of the coupe. The two open cars, Phaeton and Roadster, are entirely new in design, with long, lower lines and more beautiful appearance.

On these cars, the new moulding, flowing back from the radiator, joins the body belt in a panel at the cowl, giving a streamline effect.

No change will be made in the price of the various types.

Are the Readers of This Paper Reading Your Advertisement or Someone Else's?

The readers of this paper are reading the advertisements in it. If they are not reading your advertisement, Mr. Merchant, they are reading someone else's.

If they are reading someone else's advertisements they are going to be influenced to trade with the merchant who invites them to his store, who describes in an interesting way his merchandise, who creates by his carefully written advertisements, a desire for the things he has to sell.

Well written advertisements backed by good merchandise, good merchandising and modern merchandising methods, are the stepping stones to success in the mercantile business today.

NEWS REVIEW OF CURRENT EVENTS

Discord Among Senate Drys and Officials Over Law Enforcement.

By EDWARD W. PICKARD

DISSENT among the dry leaders of congress and dissatisfaction with President Hoover's law enforcement commission marred the good will toward men that is supposed to characterize the Christmas season. United States District Judge Paul J. McCormick of Los Angeles, a member of the commission, who had been sitting on the federal bench in New York, started the fireworks when on his return home he found occasion to make some very caustic remarks concerning the prohibition problem.

"A man's home is his castle," said the judge, "and the practice of entering it in the name of prohibition enforcement without legal procedure should be abolished."

The national commission, the judge said, already has determined that two major problems require immediate settlement: one is the solution of prohibition enforcement and the other is the removal of "governmental lawlessness" and restoration of constitutional rights to citizens.

"Speaking as an individual," Judge McCormick pronounced fanaticism one of the most serious enemies of prohibition. He said fanaticism were to be found in the ranks of both wets and drys.

William J. Harris of Georgia, one of the leading drys in the senate, was roused to immediate action and demanded that the President remove the Los Angeles jurist from the commission.

"Judge McCormick's statement shows that just what I feared was being done to him," said Senator Harris. "It really is an encouragement to violators of the law and it shows Judge McCormick to be such a partisan as to let the prohibition enforcement law that, no matter how honest he may be, he is entitled to hold off on the commission. Unless the commission stops its secret sessions and comes out in the open, its usefulness is impaired to such an extent that no report will be given to the country and he is greatly disappointed if the President does not remove this man, who has outraged and polluted the state as well as violators of the law."

Harris was joined by other senate drys urging that Mr. Hoover and the commission make an early report on the liquor question. Senator Charles McNary of Virginia came to hear from the commission, but he does not think Judge McCormick should be retained from that body.

"I do not participate in Senator Harris' view of the matter at all," said Senator Charles McNary. "It is not my duty to say that the commission was appointed to find out what would be the best way to enforce the prohibition law, but it is my duty to say that the commission should be given the right to report to the country what it finds out."

"If Judge McCormick or any other member of the commission by the commission's name has found out what is the best way to enforce the prohibition law, it is the duty of the commission to report to the country what it finds out."

"The purpose of the commission is to find out what is the best way to enforce the prohibition law, and it is the duty of the commission to report to the country what it finds out."

"The purpose of the commission is to find out what is the best way to enforce the prohibition law, and it is the duty of the commission to report to the country what it finds out."

William J. Harris of Georgia, one of the leading drys in the senate, was roused to immediate action and demanded that the President remove the Los Angeles jurist from the commission.

"Judge McCormick's statement shows that just what I feared was being done to him," said Senator Harris. "It really is an encouragement to violators of the law and it shows Judge McCormick to be such a partisan as to let the prohibition enforcement law that, no matter how honest he may be, he is entitled to hold off on the commission. Unless the commission stops its secret sessions and comes out in the open, its usefulness is impaired to such an extent that no report will be given to the country and he is greatly disappointed if the President does not remove this man, who has outraged and polluted the state as well as violators of the law."

Harris was joined by other senate drys urging that Mr. Hoover and the commission make an early report on the liquor question. Senator Charles McNary of Virginia came to hear from the commission, but he does not think Judge McCormick should be retained from that body.

"I do not participate in Senator Harris' view of the matter at all," said Senator Charles McNary. "It is not my duty to say that the commission was appointed to find out what would be the best way to enforce the prohibition law, but it is my duty to say that the commission should be given the right to report to the country what it finds out."

"If Judge McCormick or any other member of the commission by the commission's name has found out what is the best way to enforce the prohibition law, it is the duty of the commission to report to the country what it finds out."

"The purpose of the commission is to find out what is the best way to enforce the prohibition law, and it is the duty of the commission to report to the country what it finds out."

Discord Among Senate Drys and Officials Over Law Enforcement.

By EDWARD W. PICKARD

DISSENT among the dry leaders of congress and dissatisfaction with President Hoover's law enforcement commission marred the good will toward men that is supposed to characterize the Christmas season. United States District Judge Paul J. McCormick of Los Angeles, a member of the commission, who had been sitting on the federal bench in New York, started the fireworks when on his return home he found occasion to make some very caustic remarks concerning the prohibition problem.

"A man's home is his castle," said the judge, "and the practice of entering it in the name of prohibition enforcement without legal procedure should be abolished."

The national commission, the judge said, already has determined that two major problems require immediate settlement: one is the solution of prohibition enforcement and the other is the removal of "governmental lawlessness" and restoration of constitutional rights to citizens.

"Speaking as an individual," Judge McCormick pronounced fanaticism one of the most serious enemies of prohibition. He said fanaticism were to be found in the ranks of both wets and drys.

William J. Harris of Georgia, one of the leading drys in the senate, was roused to immediate action and demanded that the President remove the Los Angeles jurist from the commission.

"Judge McCormick's statement shows that just what I feared was being done to him," said Senator Harris. "It really is an encouragement to violators of the law and it shows Judge McCormick to be such a partisan as to let the prohibition enforcement law that, no matter how honest he may be, he is entitled to hold off on the commission. Unless the commission stops its secret sessions and comes out in the open, its usefulness is impaired to such an extent that no report will be given to the country and he is greatly disappointed if the President does not remove this man, who has outraged and polluted the state as well as violators of the law."

Harris was joined by other senate drys urging that Mr. Hoover and the commission make an early report on the liquor question. Senator Charles McNary of Virginia came to hear from the commission, but he does not think Judge McCormick should be retained from that body.

"I do not participate in Senator Harris' view of the matter at all," said Senator Charles McNary. "It is not my duty to say that the commission was appointed to find out what would be the best way to enforce the prohibition law, but it is my duty to say that the commission should be given the right to report to the country what it finds out."

"If Judge McCormick or any other member of the commission by the commission's name has found out what is the best way to enforce the prohibition law, it is the duty of the commission to report to the country what it finds out."
